

## ILLUMINATED SIGNAGE

Bright ideas for businesses and organizations!

### INDOORS OR OUT, MAKE THE SWITCH TO LIGHTBOXES!

Framed translucent graphic panels that are illuminated from the rear with LEDs or incandescent bulbs, lightboxes are popular for use inside and outdoors as menu boards, POP displays, building directories and more!

### A STREET SMART SOLUTION!

Internally illuminated and constructed with translucent panels, backlit monument signs are a large, sturdy and popular signage choice for businesses that border busy roads.

## Can You Spell D-Y-N-A-M-I-C?

LED readerboards enable you to program your messages remotely from a control pad or computer. Update your presentation easily – and enhance it with flashing or scrolling text as well as changing colors and graphics.

### HERE'S A PLUG FOR INDOOR LIGHTED SIGNS!

Illuminated directories, menu signage, lobby displays and wayfinding signs are just a few ways that lighting makes a difference indoors as well as out.

The times and days during which a well-lit sign can identify your location, advertise your products, services or purpose ... and even lend beauty to your store, office, grounds or community.

## LIGHTED-D-D ... AND IN 3D!

Highly visible at night, three-dimensional illuminated channel letters are also easy to see during the day. They're faced with translucent acrylic and backlit with energy-efficient LEDs, neon or incandescent bulbs.
